TrojanClicker:Win32/Gingplog.A

Summary

Technical information

Microsoft security software detects and removes this threat.

This trojan can use your PC to click on online advertisements without your permission or knowledge. This can earn money for a malicious hacker by making a website or application appear more popular than it is.

Find out ways that malware can get on your PC.

What to do now

Use the following free Microsoft software to detect and remove this threat:

- Windows Defender for Windows 10 and Windows 8.1, or Microsoft Security Essentials for Windows 7 and Windows Vista
- Microsoft Safety Scanner

You should also run a full scan. A full scan might find other, hidden malware.

Remove browser add-ons

You may need to remove add-ons from your browser:

- Manage add-ons in Internet Explorer
- Disable or remove Add-ons in Firefox
- Uninstall extensions in Chrome

Get more help

You can also see our advanced troubleshooting page or search the Microsoft virus and malware community for more help.

If you're using Windows XP, see our Windows XP end of support page.

Provide feedback

I want to...

Get help

- Remove difficult malware
- Avoid tech support phone scams
- See and search the latest threats
- Find answers to other problems

Fix my software

Download and update

Submit a file

Alert level: Severe
 First detected by definition: 1.173.1354.0
 Latest detected by definition: 1.203.984.0 and higher
 First detected on: May 05, 2014
 This entry was first published on: May 05, 2014
 This entry was updated on: Not available

This threat is also detected as:
 No known aliases
